

ALFALFA

EQUIPE

- High size variety with erect growth habit and hollow stems.
- Excellent leaf/stem ratio, great resistance to frequent cuts and high yield potential.
- Suitable for dehydrated flours production, thanks to its low saponins content.

ORIGIN: Synthetic variety obtained from 4 clones, one derived from a multicross of Po Valley lines and Turkish lines and three derived from cultivars Florida and Friulana di Premariacco.

RECOMMENDED SEEDING RATE: 25-35 kg/ha
