

3-ECS 5 Annuale

BEE MIX AND BIODIVERSITY

Annual spring sowing mixture composed of nectariferous and polleniferous essences, with diversified vigorous blooms, suitable for providing nutritional resources to pollinating insects.

The three species that form this mixture also help protect the soil, prevent the excessive development of weeds, offer protection to wild animals and preserve soil fertility.

COMPOSITION (3 SPECIES)

Lupinella (*Onobrychis viciifolia*)
 Veccia comune (*Vicia sativa*)
 Trifoglio persico (*Trifolium resupinatum*)

CYCLE

Annual

SOWING PERIOD

February – April

SEEDING RATE

30 – 40 Kg/ha

SIS

società italiana sementi
