| Fusarium (ear)   |     |        |      |      |

Euforial is a hybrid with excellent grain and silage yield potential. It guarantees excellent agronomic and health performance even in severe drought conditions, thanks to a perfect combination of very early flowering and strong, deep roots. This hybrid combines all the characteristics for those seeking a product that can be "chopped in 90 days" and is suitable for all conditions.
