# KORIO LIS

Constantly the most handsome in the class

NEW

- Grain with very high specific weight

- Excellent yield in all environments

CHARACTERISTICS	LOW	MEDIUM	HIGH
Plant height			
Ear insertion			
Number of rows			18-20
TKW			
Early vigor			
Stay-green			

TOLERANCES	LOW	MEDIUM	GOOD	HIGH
Lodging				
Drought				
Heat				
Helminthosporium				
Fusarium (stalk)				
Fusarium (ear)				

	GRAIN		SILAGE	
	IRRIGATED	DRYLAND	IRRIGATED	DRYLAND
Seeds/m <sup>2</sup>	8,5	7,5	9,5	8,0

This hybrid is particularly suitable for those seeking high grain yields, healthy, and colorful grain. Due to its high stay-green, leafiness, and ear-to-plant ratio, it is particularly suitable for use as a highly digestible and energy-rich silage.
