

## ALTOFIENO

Medium-early cycle

## Ryegrass and cereal based forage

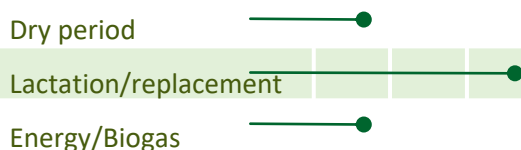

- Ideal for hay in Central and Northern areas where Crimson clover is particularly well adapted.
- The use of an early wheat allows good synchronization with the other essences and a mid early harvest
- Mow before wheat heading stage

## USAGE TYPES

\* pre-withering advised

## INTENDED USES

## SEEDING RATE

120 kg/ha

## SOWING PERIOD

Autumn

## COMPOSITION

Oat  
 Vetch  
 Lolium italicum tetrap. w.w  
 Soft wheat  
 Crimson clover  
 Egyptian clover
