

# ALTOSILO

Medium-late

## Cereals and legumes based forage

- Productive and stable mixture, that enhances the virtuous competition between species and families.
- The presence of legumes provides proteins and nitrogen availability for the cereal.
- It allows to interrupt the mono-succession of cereals (Eco 4) where autumn-winter crops for the production of biomass cannot be ignored.

### USAGE TYPES

Hay	●
Pasture	●
Green forage	●
Pre-withered	—————●
Silage	—————●

### INTENDED USES

Dry period	●
Lactation/replacement	—————●
Energy/biogas	—————●

### SEEDING RATE

200 kg/ha

### SOWING PERIOD

Autumn

### COMPOSITION

awnless triticale  
Barley  
Field pea  
Field bean
