

ERBAIO L

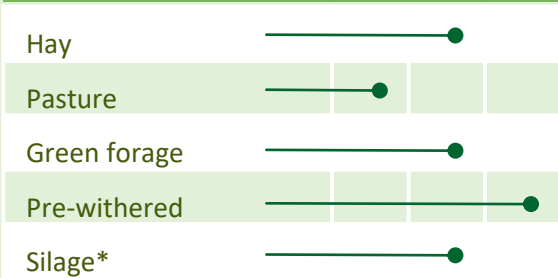

Medium-early cycle

Italian ryegrass based forage

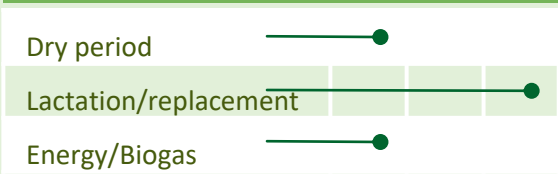

- Mixture with prevalence of legumes for a high protein intake
- The quality of the fiber and the protein content are enhanced when mowed before the ryegrass flowering.
- The use of crimson clover makes this mix particularly suitable for northern regions and for Autumn sowing.

USAGE TYPES

* pre-withering advised

INTENDED USES

SEEDING RATE

70-80 kg/ha

SOWING PERIOD

Autumn

COMPOSITION

- Common vetch
- Crimson clover
- Lolium italicum tetrap. w.w
