

# PRIMA FEED

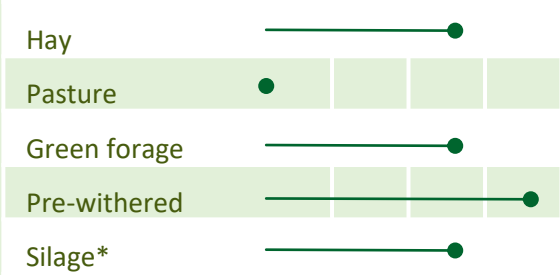

Early cycle

## Ryegrass and cereal based forage

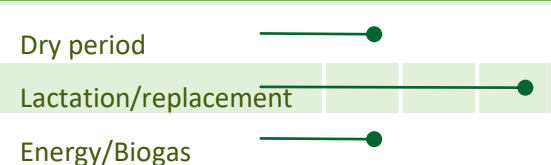

- Predominance of early Winter cereals for an early harvest, suitable for a second sowing
- For the hay use, mow at the triticale “boot” stage
- For silage, wait for the milky-waxy maturation stage of the cereals. (s.s.> 28-30%)

### USAGE TYPES

\* pre-withering advised

### INTENDED USES

### SEEDING RATE

150 kg/ha

### SOWING PERIOD

Autumn/Spring

### COMPOSITION

Early-cycle triticale  
Oat  
Vetch  
Lolium italicum tetrap. w.w
