

SANT'ANNA TARDIVO

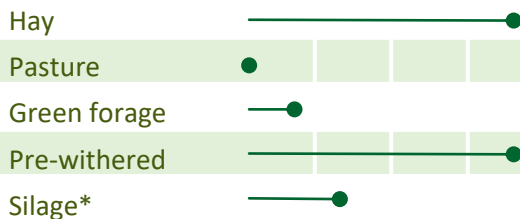

Late cycle

Late-cycle ryegrass and cereal based forage

- Forage based composed by late-cycle awnless cereals and hairy vetch (late-cycle)
- Particularly suitable for haymaking
- The late cycle allows harvesting at a time normally suitable for haymaking and makes also possible forage drying operations in the field

USAGE TYPES

* pre-withering advised

INTENDED USES

SEEDING RATE

180 kg/ha

SOWING PERIOD

Autumn
