

# TRIO

## Ryegrass and cereal based forage

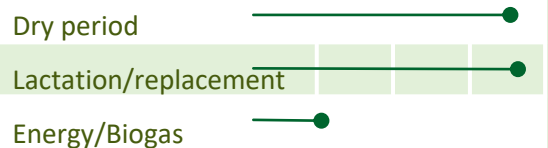

- Product for hay with low Potassium content thanks to the reduction of the ryegrass percentage
- Low potassium content for dry cows\*
- Low amounts of organic fertilization recommended to avoid excessive assimilation of Potassium.

### USAGE TYPES

### INTENDED USES

### SEEDING RATE

180 kg/ha

### SOWING PERIOD

Autumn

### COMPOSITION

Wheat  
Fodder oat  
Lolium italicum tetrap. w.w  
Red oat

\*the low potassium content is compromised if the herbage is cultivated with abundant organic fertilization. It is advisable to limit the use of nitrogen fertilizations.
