

ALTOFIENO

Medium-early cycle

Ryegrass and cereal based forage

- Ideal for the production of hay in Southern and Central area thanks to the presence of Egyptian clover
- High digestibility of the fiber
- Mow before triticale heading stage

USAGE TYPES	
Hay	<input type="range" value="4"/>
Pasture	<input type="range" value="1"/>
Green forage	<input type="range" value="3"/>
Pre-withered	<input type="range" value="5"/>
Silage*	<input type="range" value="0.5"/>

INTENDED USES	
Dry period	<input type="range" value="2"/>
Lactation/replacement	<input type="range" value="4"/>
Energy/Biogas	<input type="range" value="2"/>

SEEDING RATE
120 kg/ha

SOWING PERIOD
Autumn/Spring

COMPOSITION
Soft wheat
Lolium italicum tetrap. w.w
White oat
Egyptian clover
Red clover
