

CLOVER

Persian clover

ACCADIA

- It is the result of a selection based on resistance to cold, productivity and aptitude for regrowth.

- It grows well on loose soils and tolerates salinity well, although it cannot tolerate soil acidity.

- Excellent grass plant for grazing, mowing and haymaking.

- Good melliferous plant, appreciated by pollinators.

SOWING PERIOD Autumn and Spring

SEEDING RATE: 20-25 kg/ha
