

RYEGRASS

Loietto distico ASSO

- Diploid
- Alternative
- Early
- Italicum type

- Leafy with thin stems, particularly suitable for hay, it produces palatable forage with very high nutritional content.
- Possibility of multicutts thanks to the earliness and speed of regrowth

MAIN CHARACTERISTICS

SOWING		SEEDING RATES		TKW g	SEEDS/ Kg	USAGE TYPES
Type	Period	Seeds Kg/h	Seeds/mq			
Autumn	From end of August	25 - 30	1400	2	500.000	Hay
Spring	End of Winter	30 - 35	1600			Silage
