

# RYEGRASS

## *Loietto polistico* LIBONUS

- Tetraploid
- Alternative
- Medium late
- Westerwoldicum

- Excellent quality of hay and silage: the high leaf/stem ratio improves the digestibility of the fibre.
- Possibility of multiple cuts: the growing speed and the vigorous regrowth allow, with early sowing and in favorable conditions, even a first autumn mowing.

### MAIN CHARACTERISTICS

SOWING		SEEDING RATES		TKW g	SEEDS/ Kg	USAGE TYPES
Type	Period	Seme Kg/h	Semi/mq			
Autumn	From end of August	40 - 45	1400	2,8	357.000	Pasture, fodder and greenery Silage
Spring	End of Winter	45 - 50	1600
