

Soil protection

COMPOSITION (4 species) Perennial rye grass (turf type), Red fescue, Tall fescue (turf type), Poa pratense

BENEFITS

USAGE TYPE

Technical grassing for soil protection

SOWING PERIOD

Autumn and Spring

SEEDING RATE

160 - 180 Kg/ha

Technical grassing based on species very resistant to trampling and with limited vegetative development. It is the most suitable variety for horse strides, since it doesn't produce tufts.
